## WORK EXPERIENCE

---

### Screenloop

Software Developer - Fullstack

2021—Present  
London, United Kingdom

- Developed an interview intelligence platform enabling businesses to conduct great interviews at scale
- Prioritized clean code and adhered to best development practices to ensure high-quality solutions
- Utilized a range of technologies including Ruby on Rails, React JS, Node JS, Typescript, and Chrome Extension development.

### DoSelect - Skill Assessment Platform for Hiring and L&D

Software Engineering Intern - Backend

2021  
Bengaluru, Karnataka

- Developed and integrated new feature add-ons with naukri.com to enhance platform functionality
- Designed and built the backend of a virtual interview platform, ensuring seamless user experience
- Identified and responsibly disclosed a high-impact vulnerability, earning an internship offer in recognition of exceptional security skills.

### Acumensa Technologies

Tech Lead Intern

2021  
Bengaluru, Karnataka

- Led a full-stack web development team in building a Chrome extension and an end-to-end MERN stack product
- Conducted risk analysis at each stage of the construction process, prioritizing time and efficiency
- Utilized strong interpersonal skills to effectively interface with clients and partners at all levels.

### Newstar Cloud

Cloud Engineering Intern

2020  
Cupertino, California

- Developed a LinkedIn Recruiter Chrome Extension to streamline recruitment processes
- Utilized PHP for web development projects, enhancing company's online presence
- Optimized and managed the company's WordPress site, ensuring seamless user experience.

## PROJECTS

---

### N-Bot

2020—2023

- Developed Google Meet and Teams bots to automate meeting attendance, serving 300,000 users with a peak of 20,000 daily active users
- Implemented a freemium model with payment support, driving user engagement and revenue growth.

### Tempcloud

2019—Present

- Developed a rapid guest file sharing platform, achieving top search engine optimization (SEO) with the #1 Google search result for temporary file storage and sharing.

### Voice controlled web builder

2019

- Designed and developed a voice-controlled web builder for the inGenius Hackathon at PES University in 2019, showcasing innovative solutions for GGH.

### NoteBot

2020—Present

- Developed a Chrome extension that summarizes and transcribes meeting notes, automatically sending them to your email
- Getting 2k peak daily active users.
